

Project Management

September 13
8:30a - 5:00p

The primary responsibility of a project manager is to get the project built on time, on budget, and with a happy customer. By applying the concepts and strategies of this course, the participants will increase their professional value and thus bring value to the company and to the customer. The course explains the role of project managers during each phase of a project, including the pre-construction, construction, and post-construction phases. Project management tools and effective management of trade contractors will also be discussed.

As a graduate of this course, you will be able to:

- Explain the basics of successful project management
- Execute the pre-construction project management functions and responsibilities
- Implement the tools available for efficient project management
- Manage trade contractors effectively
- Perform project management duties during the project
- Complete the duties and responsibilities of post-project management
